IT equipment & network setup · Healthcare

A complete IT setup for a medical centre

We set up a medical centre with 20 computers and network ports, a WatchGuard firewall, two Ubiquiti access points, guest Wi-Fi and a 1 Gbps NBN FTTP internet connection.

20	1	2	1 Gbps
computers set up	WatchGuard firewall	Ubiquiti access points	NBN FTTP internet connection

Before

• The medical centre needed its computers and network ports set up.

• The setup needed a firewall, wireless access points, guest Wi-Fi and an internet connection.

After

• 20 computers set up with network ports.

• One WatchGuard firewall installed.

• Two Ubiquiti access points and guest Wi-Fi configured.

• A 1 Gbps NBN FTTP internet connection.

Computers and connections

The installation brought together 20 computers and network ports for the medical centre’s day-to-day work.

Internet and Wi-Fi

A WatchGuard firewall, two Ubiquiti access points and guest wireless completed the network setup, alongside a 1 Gbps NBN fibre-to-the-premises internet connection.
