ABOUT US

Simple, easy IT. Built in WA.

Unicorn IT Group was founded in Western Australia to make IT and cyber security easy to use and easy to understand. Today we look after clients all over Australia.

Stay secure

Threats stopped before they hit your business.

Stay working

Fast help whenever something breaks.

Stay ahead

IT that plans for where you're going.

WHY MANAGED IT?

Break-fix costs more than it looks.

- ✓ No surprise repair bills — one simple monthly price.
- ✓ Problems are found and fixed before they stop your team.
- ✓ Updates, antivirus and backups handled for you, every day.
- ✓ Someone who already knows your setup picks up the phone.

MANAGED IT PLANS

Two plans. Pick one.

Per user, per month. All prices ex GST.

	Good $150 per user / month	Gold $229 per user / month
Included Office 365 Licence	**Standard**	**Business Premium**
24/7/365 Security Operations Center	–	✓
Office 365 Managed Backup	✓	✓
Unlimited Business Hours Remote Support	✓	✓
Endpoint Manager (Intune Management)	–	✓
Next Generation Managed Antivirus	✓	✓
Managed Updates and 24/7/365 Monitoring	✓	✓
Web Hosting for 1 x Corporate Site - 20GB Space	–	✓
Exclaimer Signature Manager	–	✓
Governance, IT Roadmap and Meetings as Requested	–	✓

Onsite visit **$165 / hour**

After-hours work **$265 / hour**

Onsite and after-hours rates are ex GST. Travel time is billed separately.

Optional add-ons for both plans

Add-on	Price ex GST
Keeper Password Manager	$8 per account
Dark Web Monitoring	$7 per month
Endpoint Computer Backup 5TB	$19 per month
24/7/365 Support	$80 per month
Server Management	See server plans

Server Management: unicornitgroup.com/plans#servers

Available on Good or Gold. Optional extras, not included in the base plan.

SERVERS

Got servers?

	Good $150 per server / month	Gold $300 per server / month
24/7/365 Security Operations Center	–	✓
Managed cloud backup (per TB)	**$16**	**$8**
Unlimited Business Hours Remote Support	✓	✓
Next Generation Managed Antivirus	✓	✓
Governance, IT Roadmap and Meetings as Requested	–	✓
Managed Updates and 24/7/365 Monitoring	✓	✓
Managed logs	–	✓

DEVICES

Everything else on your network.

Firewall
$50
per firewall

Switch
$0
per switch

Wireless
$5
per SSID

Printer
$10
per printer

Managed logs
$7
per device · 90-day retention

Managed NAS
$10
per NAS

Managed NAS backup
$8
per TB

Managed Workstation Backup
$8
per TB

Per month, ex GST.

Managed Servers

Windows Server care that keeps your business working.

Maintain. Support. Update.

We support Windows Servers and, based on your plan, maintain the system, provide support, manage updates and support the applications running on it.

Server cover	Good	Gold
Per server / month ex GST	$150	$300
Business-hours remote support	Included	Included
Managed antivirus, updates and 24/7/365 monitoring	Included	Included
24/7/365 Security Operations Center	Not included	Included
Managed logs and governance / IT roadmap	Not included	Included
Cloud backup / TB / month ex GST	$16	$8

Support scoped to your environment

Tell us which applications, server roles and business tasks matter most. We agree the support scope around your systems and the plan you choose.

New hardware, only if needed

We assess your existing servers first. New server hardware is quoted after a server audit — no new-equipment price is published.

Read more: unicornitgroup.com/managed-servers

Managed Backup

Recoverable copies of the information your business relies on.

Cloud Backup to Sydney

Office 365 Managed Backup is included in Shield, Good and Gold. Our Cloud Backup stores copies in a Sydney datacentre. Server cloud backup includes monthly recovery testing.

Backup service	Rate
Office 365 Managed Backup	Included in Shield, Good and Gold
Server cloud backup — Good	$16 per TB / month ex GST
Server cloud backup — Gold	$8 per TB / month ex GST
Endpoint Computer Backup 5TB	$19 / month ex GST (Good / Gold add-on)
Managed Workstation Backup	$8 per TB / month ex GST
Managed NAS backup	$8 per TB / month ex GST

Plan for recovery, not just storage

Server cloud backup is billed per TB, in arrears, and includes monthly recovery testing. Tell us what needs protecting so we can agree the backup and recovery scope.

Keep the right copies

We help you choose the right service for your Office 365 data, computers, servers and NAS. Capacity and recovery requirements are confirmed in your quote.

Read more: unicornitgroup.com/managed-backup

Want to get compliant?

Ask us about the right approach for your business.

Essentials for enterprise IT

The direct evolution of the Essential Eight.

Essentials for cloud

SaaS and PaaS environments.

Essentials for operational technology

Industrial and control systems.

Also ask about ISO 27001 and SMB10001.

TEAMS CALLING

Teams calling

Make and receive business calls from Microsoft Teams.

Pay-As-You-Go — $9 per user per month ex GST

Landline 12c/call · Mobile 20c/min · 13/1300 30c/call

Unmetered — $15 per user per month ex GST

Unmetered landline, mobile and 13/1300 calls.

Both: no lock-in, personal direct number and online support.

International calls optional.

Ask about Yealink Teams phones.

GOVERNANCE & PLANNING

IT that follows your business plan.

IT governance, planning and your own virtual CIO. A clear roadmap, honest budgets and technology that answers to your business objectives — explained in plain English.

What is IT governance?

Making sure your technology is deliberate, not accidental. Someone checks where your business is going, plans the spending, watches the risks and reports back in words that make sense.

What you get

Your own vCIO

A virtual Chief Information Officer — an experienced IT leader in your corner, without the six-figure salary. They learn your business, sit in your planning meetings and translate the tech into plain English.

A written IT roadmap

A simple, living plan for the next 12 to 36 months: what needs replacing, what needs upgrading, what it will roughly cost and when. No more surprise failures or panic buying.

Business objectives first

We start with what you're trying to achieve — growth, new sites, better customer service, less risk — and shape the IT around that. Technology follows the business plan, never the other way around.

Sensible IT budgeting

Know what IT will cost before the year starts. We spread big replacements over time, flag what's coming and help you decide what's worth spending on — and what isn't.

Risk and compliance oversight

We keep an eye on the things that keep owners up at night: backups that actually restore, security that's actually on, and alignment with frameworks like the Essential 8, ISO 27001 or SMB1001 when you need them.

Vendor wrangling

Internet providers, software vendors, phone companies — we deal with them for you, check the bills make sense and make sure you're getting what you pay for.

GOVERNANCE & PLANNING

Built around your business objectives.

Every roadmap starts with your goals. We agree the priorities, rough costs and timing with you, then keep the plan current as your business changes.

Growing the business

Opening a new site, hiring ten people or taking on bigger clients? The plan makes sure IT is ready before you are — not scrambling after.

Controlling costs

Predictable monthly costs, planned replacements and no more emergency call-out bills. You can actually budget for IT.

Reducing risk

Downtime, data loss and cyber attacks cost real money. Governance means someone is watching those risks and doing something about them.

Getting more from your team

Slow computers, clunky systems and workarounds waste hours every week. The roadmap fixes the friction, one quarter at a time.

Winning bigger work

More tenders and corporate clients ask about your IT and security. A governed environment gives you honest, confident answers.

Sleeping at night

Someone senior owns the IT picture and you can ask them anything, any time. That's the real outcome.

Discover. Plan. Review.

We learn your business

We sit down with you and listen. Where is the business heading? What frustrates your team? What would you do if the server died tomorrow? We audit what you have and write it all down in plain language.

We build your roadmap

Together we turn your business objectives into an IT plan: priorities, rough costs and a timeline everyone understands. You approve it — nothing happens without your say-so.

We keep it on track

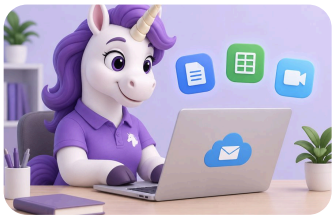
Regular catch-ups — usually quarterly — to check progress, adjust for changes in the business and plan the next quarter. The roadmap grows with you; it's never a dusty document in a drawer.

Ready for IT with a plan?

Governance and planning work is quoted to suit your business. Book a planning chat: call 1300 904 635 or visit unicornitgroup.com/governance.

WHAT ELSE WE DO

Need something else? Just ask.



Office 365

Licences, email, Teams and SharePoint set up and looked after.

VOIP

Business phones that move with your team.

Structured Cabling

Neat, tested, labelled data points.

Network Design

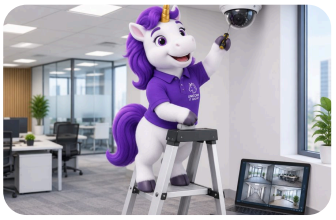
Fast, secure networks planned around your site.

Servers and Storage

On-site, cloud or hybrid — sized right.

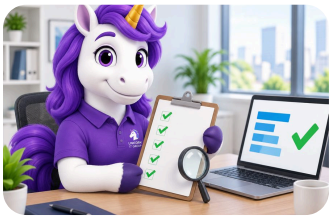
Procurement

The right hardware, ordered and delivered.



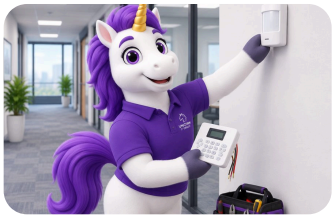
CCTV

Cameras you can check from your phone.



Audits (Essential 8)

Know where you stand and what to fix.



Security Systems

Alarms and access control for your office.

Internet Connections

NBN, Vocus or Telstra Fibre, Enterprise Ethernet.

Office Setup

Desks, furniture and tech ready on day one.

Printers

Managed print: toner, staples and servicing per print.

Meeting Rooms

One-touch Teams meetings.

Server Rooms

Racks, power and cooling done right.

Quoted to suit your business — call us and we'll build a plan.

OUR FAMILY OF BRANDS

Specialists for every job.

Backup Experts

A backup is only real once it restores. Cloud, Office 365 and Veeam backups — with a recovery test every month.

$8 per TB / mo Cloud Workstation Backup	**$15** per TB / mo Cloud Server Backup	**$6** per user / mo Office 365 Backup

On-prem and hybrid Veeam quoted to suit. Prices ex GST.

Lag Free Llamas — Business Internet

Business internet built around your office · NBN, fibre or Enterprise Ethernet, month-to-month with no lock-in.

Custom broadband solutions quoted to suit your business.

lagfreellamas.com.au

Macsperts

Business IT. Mac specialists. Managed support built for Macs.

Panda Mining IT Services

Our mine-site partner, working alongside Unicorn IT Group.

One conversation

Call us about your office, your Mac fleet or your mine site.

MACSPERTS · OUR APPLE MAC DIVISION

Managed support, built for Macs.

Mac-only specialists look after your business Macs so your team can get on with work — secure, monitored and supported.

Good

$180 / month

ex GST · Macs only

For Mac teams that need to stay secure, backed up and supported.

Office 365 Standard licence.

Best

$249 / month

ex GST · Macs only

Full-service IT with round-the-clock security and strategic guidance.

Office 365 Business Premium licence.

Security first

Next-generation antivirus on every Mac.

Always updated

Managed updates and 24/7 monitoring.

Real support

Unlimited business-hours remote help.

More than just Mac support

Ask about firewall, switch, wireless, printer and NAS management, managed backups, Teams calling, internet, cabling, network design, servers and hardware procurement.

Onsite $165/hour · After-hours $265/hour · ex GST. Travel time billed separately.

PANDA MINING IT SERVICES

Mine-site IT. Working together.

We work side by side with our partner Panda Mine Site IT, so your people get support wherever they are.

Remote connectivity

Networks and connectivity that hold up in remote places.

Cyber security

Security done properly for your people and your site.

Site-aware planning

Planning that understands what a site shutdown actually costs.

Got a mine site?

Talk to us about your location, your team and what needs to keep running. We'll discuss the support and connectivity your site needs.

Mine-site work is quoted to suit. No published Panda plan prices are included.

CASE STUDIES

Real jobs. Real outcomes.

A few of the businesses we've helped across Australia and beyond.

CONSTRUCTION

National home builder turnaround after a malware incident

A 300-staff residential builder moved from a malware clean-up and years of under-investment to modern, monitored and fully managed IT across seven offices.

300	7	~90%	18
endpoints replaced	offices connected	reduction in phone spend	virtual servers retired

- ✓ 300 standardised HP and Microsoft Surface devices, centrally managed with no personal devices on the corporate network.
- ✓ SentinelOne endpoint protection, Huntress managed detection, application control and Microsoft 365 data protection.
- ✓ Seven offices connected through WatchGuard SD-WAN, with at least 1 Gbps Enterprise Ethernet and FTTP backup links.
- ✓ Cove cloud backups for servers, endpoints and Microsoft 365, with tested restores.

PROFESSIONAL SERVICES

Moved an entire office over one weekend

With a hard move-out deadline, we planned, packed, cabled and commissioned a complete office over one weekend — ready for staff on Monday morning.

1	8	4	100%
weekend to complete the move	Teams Rooms ready on Monday	secure managed printers	of staff productive on the first morning

- ✓ The entire move completed in one weekend.
- ✓ Eight Teams Rooms ready for Monday meetings.
- ✓ Four secure managed printers deployed.
- ✓ All staff productive from the first morning.

RURAL & AGRICULTURE

Improving internet on the Unicorn Farm

A working farm’s sheds and homestead relied on one weak connection. We improved coverage and capacity so payroll, livestock software and cameras could work together.

6x	99.9%	0
usable capacity at the sheds	uptime with automatic backup switching	dropped calls reported since switch-over

- ✓ Six times the usable capacity at the sheds.
- ✓ 99.9% uptime with automatic backup switching.
- ✓ No dropped calls reported since switch-over.
- ✓ Connectivity that supports work across the property.

PROFESSIONAL SERVICES

A two-site private cloud for nearly 900 TB of business data

A client needed resilient infrastructure while retaining control of nearly 900 TB of critical data. We built Hyper-V and Synology clusters across two NEXTDC data centres, connected by dark fibre, with off-site backups.

900 TB	2	4+4	2 Gbps
of client data protected across two data centres	NEXTDC data centres with automatic failover	Hyper-V hosts and Synology appliances per site	symmetrical Vocus office internet

- ✓ Business data protected across two NEXTDC data centres.
- ✓ Four Hyper-V servers and four Synology appliances at each site.
- ✓ Clustered storage and live failover between nodes.
- ✓ Dark fibre links to the office and 2 Gbps symmetrical Vocus internet.

LEGAL

A legal firm’s files moved from an ageing server to Teams

We moved 1.8 TB of matter files to Microsoft Teams and SharePoint, connected document scanning to client folders and retired the office server — with modern device management and faster internet.

1.8 TB	0	500/500	16
of matter files migrated to Teams and SharePoint	office servers remaining	Mbps symmetrical Enterprise Ethernet	Meraki cameras across the office and carpark

- ✓ 1.8 TB of documents available through Teams and SharePoint.
- ✓ Konica Minolta printers scan directly into client folders.
- ✓ Every computer rebuilt into Microsoft Entra ID with Intune; the old server decommissioned.
- ✓ Swoop 500/500 Mbps NBN Enterprise Ethernet and a Cisco Meraki network with 16 cameras.

MANUFACTURING

Dark fibre connects a steel factory to its office 19 km away

Large production files crawled across an NBN VPN, and wireless was not an option. We connected the laser steel cutting factory and head office with dedicated Vocus dark fibre.

10 Gbps	19 km	250 Mbps	HA
dedicated dark fibre between sites	private fibre span	symmetrical office internet	WatchGuard firewall pair

- ✓ A dedicated 10 Gbps dark fibre link between the two sites.
- ✓ A private fibre span covering 19 km.
- ✓ Office internet upgraded to 250 Mbps symmetrical service.
- ✓ WatchGuard firewalls installed as a high-availability pair.

MEDIA & ENTERTAINMENT

A fresh IT environment for a 200-user drone data company

After demerging from its parent company, a drone data business needed independent IT. We delivered Microsoft 365, managed devices, a new network and access to over 800 TB of project data.

200	800 TB+	10 Gbps	8
users and machines migrated	project data in Wasabi S3 via Lucid Link	internet and core aggregation switching	Ubiquiti access points across two levels

- ✓ 200 users and machines migrated to a new Microsoft 365 environment.
- ✓ Entra ID and Microsoft Endpoint Manager for sign-ins and device management.
- ✓ Over 800 TB of Wasabi S3 storage accessed through Lucid Link.
- ✓ 10 Gbps internet, dual WatchGuard firewalls, Ubiquiti switching and eight wireless access points.

PROFESSIONAL SERVICES

A dedicated wireless link from a manager’s home to the office

Slow and unstable home NBN made remote work frustrating. We installed a dedicated point-to-point wireless bridge from the office roof to the manager’s home, bypassing the slow connection.

1 Gbps	<5 ms	99.9%	Same day
dedicated office-to-home wireless link	end-to-end delay	link uptime since installation	access to office files and systems

- ✓ A dedicated 1 Gbps wireless connection between office and home.
- ✓ Less than 5 ms end-to-end delay.
- ✓ 99.9% link uptime since installation.
- ✓ Reliable access to office files and systems without using the slow home NBN.

CONSTRUCTION

Three home builder offices connected with gigabit air fibre

Three offices roughly 300 metres apart struggled to share plans and photos. We linked them with dedicated gigabit air fibre, without trenching streets or waiting months for carrier fibre.

1 Gbps	300 m	3	99.9%
dedicated air fibre between offices	approximate distance between sites	offices connected as one network	target uptime with ring topology

- ✓ Dedicated 1 Gbps air fibre between the offices.
- ✓ Three buildings connected as one network.
- ✓ Links spanning approximately 300 metres between sites.
- ✓ Ring topology designed for a 99.9% uptime target.

CONSTRUCTION

Display homes connected to corporate systems with Meraki SD-WAN

A national home builder needed secure corporate access and reliable guest Wi-Fi at every display home. We deployed Cisco Meraki networking over Swoop NBN or 5G, linked back to NEXTDC.

100%	1 Gbps	<20 ms	Same day
of display homes connected to the data centre	Swoop fibre at the data centre head-end	delay to corporate apps from display homes	turn-up possible for new villages

- ✓ All display homes connected to the corporate data centre.
- ✓ Meraki access points and MX64 security appliances at each display home.
- ✓ A high-availability Meraki MX200 pair at NEXTDC with 1 Gbps Swoop fibre.
- ✓ Separate guest Wi-Fi and secure corporate links, with same-day turn-up possible for new villages.

ENTERPRISE

Hyper-V recovery across two NEXTDC data centres

An enterprise needed a second location for critical workloads. We built a four-host Hyper-V environment with two storage arrays, real-time replication and dedicated dark fibre between NEXTDC facilities.

4	2	2	Dedicated
Hyper-V hosts across two data centres	SAN arrays with real-time replication	Dell switch stacks for redundant networking	dark fibre between NEXTDC sites

- ✓ Four Hyper-V hosts split across two NEXTDC data centres.
- ✓ Two SAN storage arrays with real-time replication.
- ✓ Two Dell switch stacks for redundant core networking.
- ✓ An active-passive cluster linked by dedicated dark fibre.

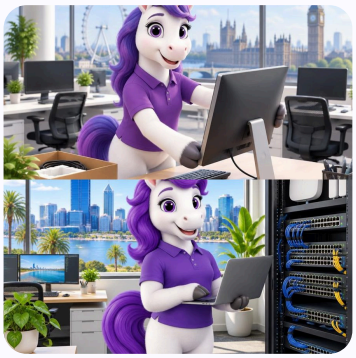
HEALTHCARE

A complete IT setup for a medical centre

We set up a medical centre with 20 computers and network ports, a WatchGuard firewall, two Ubiquiti access points, guest Wi-Fi and a 1 Gbps NBN FTTP internet connection.

20	1	2	1 Gbps
computers set up	WatchGuard firewall	Ubiquiti access points	NBN FTTP internet connection

- ✓ 20 computers set up with network ports.
- ✓ One WatchGuard firewall installed.
- ✓ Two Ubiquiti access points and guest Wi-Fi configured.
- ✓ A 1 Gbps NBN FTTP internet connection.



MANUFACTURING

Two offices, one team: London and Perth connected

We set up and connected a manufacturing company's head office in London and site office in Perth — firewalls, site-to-site VPN, wireless, switching, a 3CX phone system for free calls between offices, Teams and SharePoint, server backup, 1 Gbps internet at both sites — and a managed IT support plan that looks after the people at both offices.

100	55	2	1 Gbps
users in the London head office	users in the Perth office	WatchGuard firewalls with site-to-site VPN	internet at both offices

- ✓ WatchGuard firewalls at both sites joined by a site-to-site VPN, so the offices work as one network.
- ✓ Ubiquiti wireless and switches installed at both offices.
- ✓ A 3CX phone system lets the two offices call each other for free.
- ✓ A small site server holds sensitive data, with backup of the site servers in place.

Access Control

Control who enters your workplace, and when.

- Cards, PINs or phone access for doors, gates and server rooms.
- Time-based access for staff, cleaners and visitors.
- Remove access when someone leaves; review readable door logs.
- Installed, tested and connected safely with your cameras and alarms.

Quoted to suit your business. Just ask.

Audio Visual Systems

Display walls, large screens and meeting rooms that work together.

- Supply and install display walls and large screens.
- Show dashboards, camera feeds, maps and rosters to the whole room.
- Connect laptops and Teams meetings to your room displays.
- Neat, labelled cabling with power and room requirements planned.

Quoted to suit your business. Just ask.

Managed print plans

Hate printers? One simple plan for the printer, ink and servicing.

MANAGED PRINTERS FROM	COLOUR PRINTING	BLACK PRINTING
$500	**7c**	**1c**
per month	per print	per print

Ink included. Monthly plan plus per-print charges.

How a quote works: tell us about your printers and print volume, we call you back, then we quote a managed print plan to suit your office.

Request a managed print quote

Our Family

Big personalities. Purple manes. A few tiny hooves.

Bradley Amm

A friendly male unicorn with a confident grin and a practical streak.

Likes: Good ideas, helping others and keeping things simple.

Dislikes: Unnecessary fuss and making things harder than they need to be.

The hands-on one

A thoughtful male unicorn with a steady hoof and a cheeky grin.

Likes: Building computers, neat toolkits and helping his mates.

Dislikes: A missing screwdriver and someone borrowing it without asking.

The easygoing one

A friendly male unicorn who stays calm and sees the funny side.

Likes: A good chat, round glasses and a fresh cup of tea.

Dislikes: Cold tea and a microphone left on mute.

Meet more of our family: unicornitgroup.com/unicorns

Our Family

Big personalities. Purple manes. A few tiny hooves.

The welcoming one

A bright, bubbly female unicorn who is first to say hello.

Likes: New faces and making people feel at home.

Dislikes: Awkward introductions and confusing instructions.

The chatty one

A warm, reassuring female unicorn and a brilliant listener.

Likes: Good conversations and a happy caller.

Dislikes: Being interrupted by a flat headset battery.

The little legends

Two curious baby unicorns. Big personalities, tiny hooves.

Likes: Building blocks, colourful toy keyboards and cuddles.

Dislikes: Nap time and being told the keyboard isn’t a piano.

Meet more of our family: unicornitgroup.com/unicorns

IT Support FAQ

Common questions about support on our Good and Gold managed IT plans.

How do I get support?

Call our support line on 1800 879 635 or email support@uitg.com.au. Every email automatically creates a ticket so nothing gets lost.

How fast will you respond?

We respond within one hour. How long a fix takes depends on the issue, but you'll always know where things stand.

What support is included in my plan?

Both Good and Gold include unlimited business-hours remote support, plus managed updates and 24/7/365 monitoring.

Can I get help after hours?

Yes. Add 24/7/365 Support to either plan for $80 per month ex GST, or pay as you go at $265 per hour ex GST.

Do you come to our office?

Yes. Onsite visits are $165 per hour ex GST, with travel time billed separately.

What's the difference between Good and Gold?

Good covers the essentials: Office 365 licence, managed backup, unlimited remote support, next-gen anti-virus and managed updates. Gold adds Business Premium, security centre, endpoint manager, web hosting, eclaimer, governance and a next-gen spam and scam email filter.

How much do the plans cost?

Good is $150 per month ex GST and Gold is $229 per month ex GST, with optional add-ons such as Keeper, dark web monitoring and endpoint backup.

Not sure which plan suits you?

Use the plan finder at unicornitgroup.com/plans or ask us for a callback and we'll talk it through.

Do you watch our systems when we don't call?

Yes. 24/7/365 monitoring and managed updates mean we usually fix problems before you notice them.

How do we get started or change plans?

Send us a message at unicornitgroup.com/contact and we'll call you back to work out the right fit.

Still stuck? Talk to a human.
