Medical Company Deployed 400 HP EliteBooks for Department of Health Contract

A medical company awarded a major contract by the Australian Department of Health needed 400 HP EliteBooks delivered fast to new staff across the country. We supplied the machines, accessories and asset labels, then configured Windows Autopilot policies in Microsoft Endpoint Manager so every laptop was ready to work straight out of the box.

KEY RESULTS

400

HP EliteBooks drop-shipped to staff

0

manual imaging or site visits required

Same day

productive once connected to Wi-Fi

BEFORE

- 400 new staff needed fully configured laptops before contract commencement
- No central IT team at every location to unbox, image and install software manually
- Medical compliance required consistent app deployment, security settings and asset tracking
- Previous device rollouts had caused delays, incorrect builds and missing accessories

AFTER

- 400 - HP EliteBooks drop-shipped to staff
- 0 - manual imaging or site visits required
- Same day - productive once connected to Wi-Fi
- Procured 400 HP EliteBooks with carry bags, extra chargers and pre-printed asset labels

"Our staff opened the box, turned the laptop on, connected to Wi-Fi, and everything they needed was there. It was the smoothest rollout we have ever done."

- Operations manager, medical services company
