

Deployed 86 Meraki Cloud Security Cameras Around Town

A town needed eyes across public spaces without trenching fibre to every pole. We rolled out 86 Meraki cloud-managed security cameras on 5G, each recording to onboard storage, so security and police can review footage from anywhere without paying for always-on backhaul.

KEY RESULTS

86

Meraki cameras deployed on 5G

3 months

typical onboard storage retention

Major

savings on backhaul and cloud storage

BEFORE

- Public spaces across the town had no reliable wired connectivity for CCTV
- Trenching fibre to dozens of locations was expensive, disruptive, and slow to approve
- Traditional wireless links struggled with distance, weather, and line-of-sight issues
- Police and security teams needed remote access to footage without waiting on site

AFTER

- 86 - Meraki cameras deployed on 5G
- 3 months - typical onboard storage retention
- Major - savings on backhaul and cloud storage
- Selected Meraki cloud-managed cameras with onboard storage and 5G cellular connectivity

"We can check any camera from the station or the patrol car. The footage is there when we need it, and we are not drowning in storage bills."

- Security coordinator, local council
